WIN a Glow-worm Easicom boiler!

To mark the relaunch of the famous **Glow-worm Mystery Trip** we're offering PHAM News readers the chance to win the company's new **Easicom boiler**

6 We have six to win, with one boiler given away each month over the course of six issues.

THE PRIZE

The super light, super efficient, super value Easicom boiler has been specifically designed with the needs of the installer and their customers in mind. The range features a low maintenance automotive grade aluminium silicate heat exchanger, and a patented four-sided cooling system to reduce the stress on the heat exchanger to deliver long-term reliability for homeowners.

Compatible with the existing flue range for easy replacement of older boilers, the boiler also comes with a choice of bespoke accessories, including a large aesthetic pipe cover panel and universal upward piping kit. Each boiler also offers a DIN pipe

layout to make boiler swaps quick and easy, and larger waterways, making it perfect for retrofit jobs.

Easicom's sleek design features a bright and easy-to-read LCD display, and its quiet operation means minimal noise for homeowners. The range can also be used alongside a choice of controls, including Glow-worm's Climastat smart thermostat, which not only empowers homeowners to efficiently manage their heating and hot water, but will also meet Boiler Plus regulations.

The range is connected to Glow-worm's Club Energy installer scheme which, when the Easicom installation is registered, will initiate a five-year guarantee.

HOW TO ENTER

Ho Chi Minh City, commonly known as Saigon, will be the destination of the 2020 Glow-worm Mystery Trip. Guests on the five-day all-expenses paid trip will be treated to a stay at five-star hotel, Caravelle Saigon, sited right in the heart of the city, just minutes away from bustling street markets and iconic landmarks.

For a chance to win an Easicom boiler, all you have to do is answer the following question about the next Mystery Trip destination:

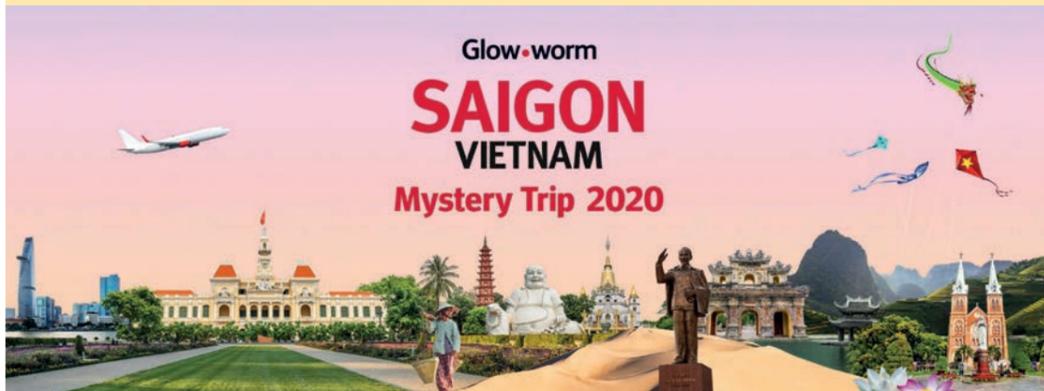

What is the national language of Vietnam?

A. French B. English C. Vietnamese

Email your answer to editor@phamnewsedit.co.uk with **'Win an Easicom'** in the subject line. Please make sure you include the following:

- * Your name and your company's name * Contact telephone number * Your Gas Safe Reg No.
- * Please type **'YES'** in the body of your email if you are happy to receive email offers from Glow-worm

All correct answers received before the closing date of 20th January 2020 will be entered into the prize draw. **Only one entry per person will be allowed.**

Leafy glass adds a touch of class

Extending its RefleXion Black Wetroom Panel range, PJH has introduced an arty new Black Leaf design to its 8mm glass collection. The RefleXion 8 Black Wetroom category now includes both the new glass panel as well as new wetroom side panels for the black panelled collection.

This 1200mm wide wetroom screen is manufactured from high quality 8mm toughened safety glass and the fine black leaf design is complemented with a matt black profile and support arm. And

with a generous height of 2000mm, this new wetroom provides an 'immersed' showering experience. The new panel features concealed fixings and Easy Clean glass treatment. The screen is wetroom compatible and can be installed directly onto a prepared floor or combined with a tray, and an easy-fit rubber gasket is supplied with a quick fit tool for simple installation.

Flush plate options for a variety of scenarios

The latest flush plates from Multikwik are designed to suit an array of bathroom styles and budgets. Options available include the Hydra, iO infrared, Luna and Metis flush plates.

The Hydra range includes the Hydra Glow option (pictured) that offers an illumination strip that lights up in a choice of seven interchangeable colours, including a vibrant green.

The iO with infrared sensor provides contactless operation, helping to improve hygiene levels in public bathroom settings. It includes an auto forced flushing and cleaning mode, whereby it can be programmed to self-flush at selected intervals, should the bathroom or building not be occupied

for long periods of time, or as an additional hygiene safeguard.

Multikwik also offers a bespoke option for the iO, allowing commercial customers to customise the flush plate by adding their logo or company name to the top of the plate, bringing a personal touch to any washroom or bathroom.

Luna and Metis, the final additions to Multikwik's collection, are more traditional flush plates, both available with either a white, chrome or satin chrome finish.

Plinth heater has wireless control

Heating manufacturer Thermix has launched a hydronic plinth heater controlled by a wireless thermostat. The wireless models provide temperature control for better energy management compared to traditional models controlled by just an on/off switch.

The wireless plinth heater is also available with a programmable thermostat, providing a 7-day timing facility. This allows the user to set the timing as well as the temperature.

Thermix wireless plinth heater models are available with four different heat outputs ranging from 1.5 to 2.4 kW. Also offered are a choice of front grilles, including a brushed stainless steel version,

and a range of powder coated options in white, silver or black. For customers who want to colour-match their plinth, there is a self-colour grille ready to paint.

Customers also have the option of choosing from a simple wireless thermostat or a smart phone controlled thermostat. For larger kitchens multiple wireless plinth heaters can be controlled by a single thermostat.

With a low water content, plinth heaters provide fast heat response and leave less residual heat when the heater turns off, providing comfort heating to the user but also saving energy by not heating the room when it's not needed.
